

Irshad Girach's Profile

About Irshad: Irshad has a technical mind and a creative soul, which gives him a special way of looking at problems. He has been a developer for 3+ years and has also dipped his toes into design for about a year. Most of his work has been with startups, where he got to take on more than just coding - team leadership, product planning, and even showing off their company work to investors and customers. It's these experiences and challenges that really get him going.
